

Lighting Design – Our Expertise

Light is an important component of contemporary architecture. It plays an important role in the staging of buildings as well as in terms of sustainability and energy efficiency. Last but not least, it has a big impact on users' work environment.

We work closely with architects and users to ensure optimal lighting solutions are developed and implemented.

The globally-active lighting design office Bartenbach GmbH and HKG have worked together since 2015 on daylighting and artificial lighting engineering with the aim of offering customers a profitable added value.

Our range of services covers the following areas:

- Daylight engineering
- Artificial lighting engineering
- Efficiency analysis and building tuning
- Provision of evidence for Minergie rating

Challenge us – together we will win!
